

QR-1 & QR-5

QuickRelease Adapter for Microphone Stands and Microphone Clips

The **QR-1** is the perfect tool for expeditious swapping of microphones in the studio or on stage. The bottom half threads onto a 5/8" microphone stand while the top half threads into a 5/8" threaded microphone clip. To disconnect the two, simply pull down on the lower half while lifting up on the top half! A ball bearing, teeth in groove design provides an extra tight, quiet connection while an all-steel structure means it can stand the rigours of the road. The **QR-5** is a five-pack that includes a *FREE* carrying case!

Ball bearing, teeth in groove design with extra tight, quiet connection!

Incredibly easy to disconnect the top half from the bottom half

5/8" thread on both ends
