1 General notes

This manual contains important instructions for the safe operation of the unit. Read and follow the safety instructions and all other instructions. Keep the manual for future reference. Make sure that it is available to all those using the device. If you sell the unit please make sure that the buyer also receives this manual.

Our products are subject to a process of continuous development. Thus, they are subject to change.

1.1 Further information

On our website (www.thomann.de) you will find lots of further information and details on the following points:

| | |
|-----------------------|---|
| Download | This manual is also available as PDF file for you to download. |
| Keyword search | Use the search function in the electronic version to find the topics of interest for you quickly. |
| Online guides | Our online guides provide detailed information on technical basics and terms. |
| Personal consultation | For personal consultation please contact our technical hotline. |
| Service | If you have any problems with the device the customer service will gladly assist you. |

1.2 Notational conventions

This manual uses the following notational conventions:

Letterings

The letterings for connectors and controls are marked by square brackets and italics.

Examples: *[VOLUME]* control, *[Mono]* button.

Displays

Texts and values displayed on the device are marked by quotation marks and italics.

Examples: *'24ch'*, *'OFF'*.

1.3 Symbols and signal words

In this section you will find an overview of the meaning of symbols and signal words that are used in this manual.

| Signal word | Meaning |
|---|--|
| DANGER! | This combination of symbol and signal word indicates an immediate dangerous situation that will result in death or serious injury if it is not avoided. |
| WARNING! | This combination of symbol and signal word indicates a possible dangerous situation that can result in death or serious injury if it is not avoided. |
| NOTICE! | This combination of symbol and signal word indicates a possible dangerous situation that can result in material and environmental damage if it is not avoided. |
| Warning signs | Type of danger |
|  | Warning – high-voltage. |
|  | Warning – suspended load. |

| Warning signs | Type of danger |
|---|------------------------|
|  | Warning – danger zone. |

2 Safety instructions

Intended use

This device is intended for use as an electronic lighting effect by means of LED technology. The device is designed for professional use and is not suitable for use in households. Use the device only as described in this user manual. Any other use or use under other operating conditions is considered to be improper and may result in personal injury or property damage. No liability will be assumed for damages resulting from improper use.

This device may be used only by persons with sufficient physical, sensorial, and intellectual abilities and having corresponding knowledge and experience. Other persons may use this device only if they are supervised or instructed by a person who is responsible for their safety.

Extend the life of the device by regular breaks in operation and avoid switching it on and off frequently. This device is not suitable for continuous use.

Safety**DANGER!****Danger for children**

Ensure that plastic bags, packaging, etc. are disposed of properly and are not within reach of babies and young children. Choking hazard!

Ensure that children do not detach any small parts (e.g. knobs or the like) from the unit. They could swallow the pieces and choke!

Never let children unattended use electrical devices.

**DANGER!****Electric shock caused by high voltages inside**

Within the device there are areas where high voltages may be present. Never remove any covers.

There are no user-serviceable parts inside.

Do not use the device if covers, protectors or optical components are missing or damaged.

DANGER!

Electric shock caused by short-circuit

Do not modify the mains cable or the plug. Failure to do so could result in electric shock/death or fire. If in doubt, seek advice from a registered electrician.

WARNING!

Eye damage caused by high light intensity

Never look directly into the light source.

WARNING!

Risk of epileptic shock

Strobe lighting can trigger seizures in photosensitive epilepsy. Sensitive persons should avoid looking at strobe lights.

WARNING!

Risk of injury caused by falling objects

Make sure that the installation complies with the standards and rules that apply in your country. Always secure the device with a secondary safety attachment, such as a safety cable or a safety chain.

Secure the barn door with a safety cable on the spotlight after installation. The safety cable must run outside the barn door and must not interfere with the light emission.

NOTICE!

Risk of fire

Do not block areas of ventilation. Do not install the device near any direct heat source. Keep the device away from naked flames.

NOTICE!

Operating conditions

This device has been designed for indoor use only. To prevent damage, never expose the device to any liquid or moisture. Avoid direct sunlight, heavy dirt, and strong vibrations.

NOTICE!

Power supply

Before connecting the device, ensure that the input voltage (AC outlet) matches the voltage rating of the device and that the AC outlet is protected by a residual current circuit breaker. Failure to do so could result in damage to the device and possibly injure the user.

Unplug the device before electrical storms occur and when it is unused for long periods of time to reduce the risk of electric shock or fire.

3 Features

The CX series brings all-new colour creations into the range of LED lights. The multi-chip LEDs provide an unprecedented colour mixing in all spectra. Pastel colours, vivid and vibrant colours and white tones can be displayed extremely precisely using the spotlights of the CX series.

Special features of the device:

- 18 × 4-in-1 quad-colour LEDs high power RGBW type, 8 W each
- Control via DMX (4, 6 or 8 channels) and via buttons and display on the unit
- Automatic mode and sound control
- Master / Slave operation
- Robust metal housing

For technological reasons, the light output of LEDs decreases over their lifetime. This effect increases with higher operating temperature. You can extend the service life of the illuminants by providing adequate ventilation and operating the LEDs with the lowest possible brightness.

4 Installation

Unpack and carefully check that there is no transportation damage before using the unit. Keep the equipment packaging. To fully protect the device against vibration, dust and moisture during transportation or storage use the original packaging or your own packaging material suitable for transport or storage, respectively.

WARNING!

Risk of injury caused by falling objects

Make sure that the installation complies with the standards and rules that apply in your country. Always secure the device with a secondary safety attachment, such as a safety cable or a safety chain.

Secure the barn door with a safety cable on the spotlight after installation. The safety cable must run outside the barn door and must not interfere with the light emission.

NOTICE!

Risk of overheating

The distance between light output and the illuminated surface must be more than 1.5 m (19.7in).

Provide sufficient ventilation.

The ambient temperature must always be below 40 °C (104 °F).

NOTICE!

Use of stands

When mounting the device onto a stand, ensure that the stand is in a safe and stable position and that the weight of the device does not exceed the maximum permissible load capacity of the stand.

NOTICE!

Possible data transmission errors

For error-free operation make use of dedicated DMX cables and do not use ordinary microphone cables.

Never connect the DMX input or output to audio devices such as mixers or amplifiers.

Mounting options

You can install the unit in hanging or standing position. When in use, the device must always be attached to a solid surface or an approved truss. Use the openings of the two-piece bracket for mounting.

Always work from a stable platform whenever installing, moving or servicing the unit. In doing so, the area underneath the unit must be cordoned off.

The safety cable must be attached to the bracket.

Please note that this device must not be connected to a dimmer.

5 Starting up

Create all connections while the device is off. Use the shortest possible high-quality cables for all connections. Take care when running the cables to prevent tripping hazards.

Connections in DMX mode

Connect the DMX input of the device to the DMX output of a DMX controller or another DMX device. Connect the output of the first DMX device to the input of the second one, and so on to form a daisy chain. Always ensure that the output of the last DMX device in the daisy chain is terminated with a resistor ($110\ \Omega$, $\frac{1}{4}\text{ W}$).

Connections in master/slave mode

When you configure a group of devices in master/slave mode, the first unit will control the other units for an automatic, sound-activated, synchronized show. This function is ideal when you want to start a show immediately. Connect the DMX output of the master device to the DMX input of the first slave device. Then connect the DMX output of the first slave device to the DMX input of the second slave device and so on.

6 Connections and controls

Rear panel

Stage-PAR CX-3 RGBW18x8W

| | |
|-----|---|
| 1 | Power cord. |

| 9 | <i>[DMX IN]</i> DMX input. |
| 10 | <i>[DMX OUT]</i> DMX output |

7 Operating

7.1 Starting the device

Connect the device to the power supply to start operation. After a few seconds, the display indicates that a reset is in progress. The device is then ready for use.

7.2 Main menu

Press *[M]* to activate the main menu and select an operating mode. Use the arrow buttons to change the respectively displayed value. When the display shows the desired value, press the *[OK]* button.

If you don't press any button for about 1 minute, the unit returns to the previously selected mode. The set values are retained even when the device is disconnected from the mains power supply.

DMX mode

Press *[M]*. Press one of the arrow buttons repeatedly until the display shows 'SET'. Press *[OK]*. Press one of the arrow buttons repeatedly until the display shows 'MODE'. Press *[OK]*. Now use the arrow buttons to select one of the following DMX modes:

- '4CH' (four channels)
- '6CH' (six channels)
- '8CH' (eight channels)

This setting is only relevant when the device is controlled via DMX. When the display shows the desired value, press the *[OK]* button to confirm the selection and then *[M]* to return to the parent menu. To return to the parent menu without making changes, press the *[M]* button.

DMX address

Press *[M]*. Press one of the arrow buttons repeatedly until the display shows 'DMX'. Press *[OK]*. Now you can set the number of the first DMX channel to be used by the device (DMX address). Use the arrow buttons to select a value between 1 and 512 (display shows 'A001' ... 'A512').

When the display shows the desired value, press the *[OK]* button to confirm the selection and then *[M]* to return to the parent menu. To return to the parent menu without making changes, press the *[M]* button.

Make sure that this number matches the configuration of your DMX controller. The following table shows the highest possible DMX address for the various DMX modes.

| Mode | Highest possible DMX address |
|-----------|------------------------------|
| 4-channel | 509 |
| 6-channel | 507 |
| 8-channel | 505 |

Operating mode 'Show/Master'

Press *[M]*. Press one of the arrow buttons repeatedly until the display shows 'LINE'. Press *[OK]*. Press one of the arrow buttons repeatedly until the display shows 'MA'. Press *[OK]*. Now you can select one of the preprogrammed automatic shows. Use the arrow buttons to select a value between 1 and 42 (display shows 'P-01' ... 'P-42').

The auto show can only be activated on the device that is configured as master.

This setting is only relevant if the device is not controlled via DMX. The device can operate in stand-alone mode or control connected devices of the same type, that must be configured as slaves. When the display shows the desired value, press the *[OK]* button to confirm the selection and then *[M]* to return to the parent menu. To return to the parent menu without making changes, press the *[M]* button.

Operating mode 'Slave'

Press *[M]*. Press one of the arrow buttons repeatedly until the display shows 'LINE'. Press *[OK]*. Press one of the arrow buttons repeatedly until the display shows 'SL'. Press *[OK]*. Now you can set the number for the device via which it is addressed by the master as a slave. Use the arrow buttons to select a value between 1 and 512 (display shows 'A001' ... 'A512').

This setting is only relevant if the device is operating as Slave controlled by a Master, but not via DMX. When the display shows the desired value, press the *[OK]* button to confirm the selection and then *[M]* to return to the parent menu. To return to the parent menu without making changes, press the *[M]* button.

Programme speed

Press *[M]*. Press one of the arrow buttons repeatedly until the display shows 'SET'. Press *[OK]*. Press one of the arrow buttons repeatedly until the display shows 'SPEE'. Press *[OK]*. Now you can adjust the programme speed for the preprogrammed automatic shows. Use the arrow buttons to select a value between 1 and 255 (display shows 'T001' ... 'T255').

This setting is only relevant if the device is not controlled via DMX. When the display shows the desired value, press the *[OK]* button to confirm the selection and then *[M]* to return to the parent menu. To return to the parent menu without making changes, press the *[M]* button.

Microphone sensitivity

Press *[M]*. Press one of the arrow buttons repeatedly until the display shows 'SET'. Press *[OK]*. Press one of the arrow buttons repeatedly until the display shows 'MIC'. Press *[OK]*. Now you can adjust the sensitivity of the built-in microphone for sound control. Use the arrow buttons to select either 'OFF' (microphone off) or a value between 1 and 30 (display shows 'M-01' ... 'M-30').

This setting is only relevant if the device is not controlled via DMX. When the display shows the desired value, press the *[OK]* button to confirm the selection and then *[M]* to return to the parent menu. To return to the parent menu without making changes, press the *[M]* button.

Manual test

Press *[M]*. Press one of the arrow buttons repeatedly until the display shows 'TEST'. Press *[OK]*. Press one of the arrow buttons repeatedly until the display shows 'RED', 'GREE', 'BLUE', 'WHIT' or 'STRO'. Press *[OK]*. Now you can set the brightness of the red, green, blue or white LEDs each in a range from 0 to 255, or select the strobe rate in a range of 0 to 24.

This mode is also suitable for generating constant or flashing light of a colour mixed from the four LED colours without DMX control.

When the display shows the desired value, press the *[OK]* button to confirm the selection and then *[M]* to return to the parent menu. To return to the parent menu without making changes, press the *[M]* button.

Fade speed

Press *[M]*. Press one of the arrow buttons repeatedly until the display shows 'FADE'. Press *[OK]*. Now you can set the fade speed of the preprogrammed automatic shows. Use the arrow buttons to select a value between 1 and 7 (display shows 'F-01'... 'F-07').

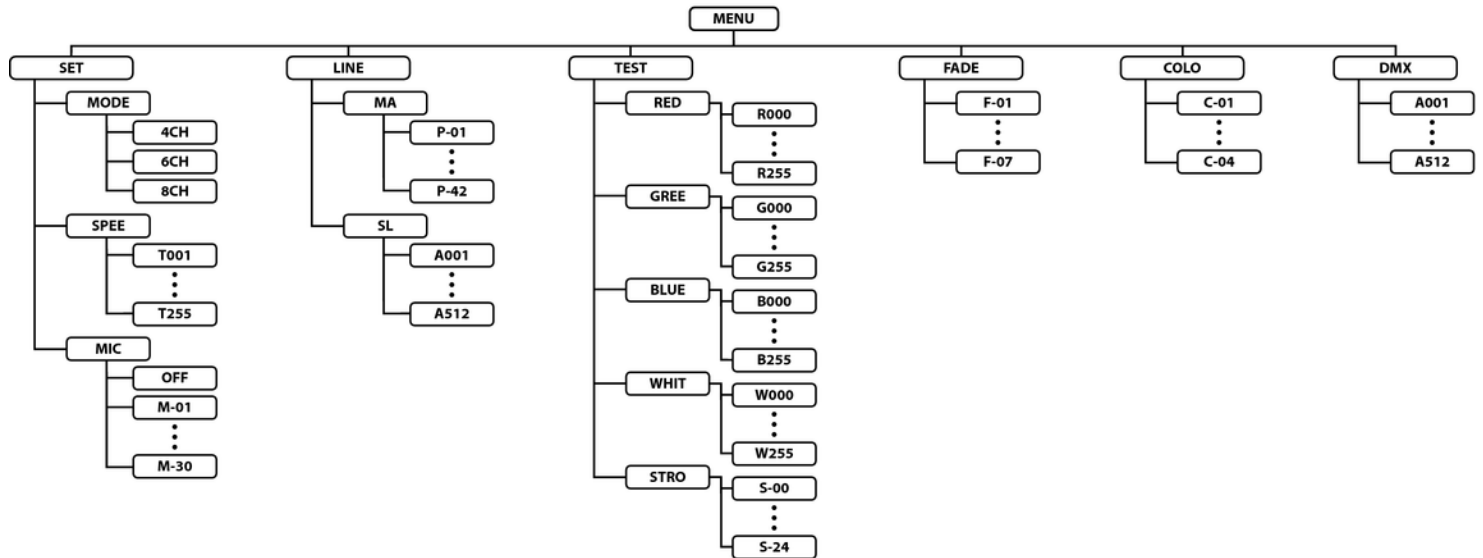

This setting is only relevant if the device is not controlled via DMX. When the display shows the desired value, press *[OK]* to confirm the selection and return to the main menu. To return to the main menu without making changes, press *[M]*.

Colour selection

Press *[M]*. Press one of the arrow buttons repeatedly until the display shows 'COLO'. Press *[OK]*. Now you can set a basic colour for the preprogrammed automatic shows. Use the arrow buttons to select a value between 1 and 4 (display shows 'C-01' ... 'C-04').

This setting is only relevant if the device is not controlled via DMX. When the display shows the desired value, press *[OK]* to confirm the selection and return to the main menu. To return to the main menu without making changes, press *[M]*.

7.3 Menu overview

7.4 Functions in 4-channel DMX mode

| Channel | Value | Function |
|---------|---------|--------------------------------|
| 1 | 0...255 | Intensity red (0 % to 100 %) |
| 2 | 0...255 | Intensity green (0 % to 100 %) |
| 3 | 0...255 | Intensity blue (0 % to 100 %) |
| 4 | 0...255 | Intensity white (0 % to 100 %) |

7.5 Functions in 6-channel DMX mode

| Channel | Value | Function |
|---------|----------------|--|
| 1 | Mode selection | |
| | 0...63 | Constant colour, the hue is set by channels 2 to 5 |
| | 64...127 | Automatic colour change with 7 colours, channels 2 to 5 without function |

| Channel | Value | Function |
|---------|--|---|
| | 128...191 | Automatic colour change with 12 colours, channels 2 to 5 without function |
| | 192...255 | Automatic colour change with 4 colours, channels 2 to 5 without function |
| 2 | 0...255 | Intensity red (0 % to 100 %), if channel 1 = 0...63 |
| 3 | 0...255 | Intensity green (0 % to 100 %), if channel 1 = 0...63 |
| 4 | 0...255 | Intensity blue (0 % to 100 %), if channel 1 = 0...63 |
| 5 | 0...255 | Intensity white (0 % to 100 %), if channel 1 = 0...63 |
| 6 | Effects speed and sound control sensitivity | |
| | 0...10 | No automatic colour change |
| | 11...255 | Automatic colour change as set by channel 1, decreasing speed from fast to slow, if channel 1 = 64...127 |
| | | Automatic colour change as set by channel 1, increasing speed from slow to fast, if channel 1 = 128...191 |
| | Sound control sensitivity (from insensitive to highly sensitive), if channel 1 = 192...255 | |

7.6 Functions in 8-channel DMX mode

| Channel | Value | Function |
|---------|----------------------|--|
| 1 | 0...255 | Intensity Red (0 % to 100 %), if channel 5 = 0...15 and channel 7 = 0...31 |
| 2 | 0...255 | Intensity Green (0 % to 100 %), if channel 5 = 0...15 and channel 7 = 0...31 |
| 3 | 0...255 | Intensity Blue (0 % to 100 %), if channel 5 = 0...15 and channel 7 = 0...31 |
| 4 | 0...255 | Intensity White (0 % to 100 %), if channel 5 = 0...15 and channel 7 = 0...31 |
| 5 | Fixed colour pattern | |
| | 0...15 | No fixed colour and movement pattern |
| | 16...255 | One of 31 preprogrammed colour patterns, channels 6 and 7 without function |
| 6 | Strobe effect | |
| | 0...15 | Full brightness, no strobe effect |
| | 16...255 | Strobe effect, increasing speed, if channel 5 = 0...15 |
| 7 | Mode selection | |

| Channel | Value | Function |
|---------|-----------|---|
| | 0...31 | Constant colour, the hue is set by channels 1 to 4 |
| | 32...63 | Fade-out effect, speed controlled by channel 6 |
| | 64...95 | Fade-in effect, speed controlled by channel 6 |
| | 96...127 | Fade-in-out effect, speed controlled by channel 6 |
| | 128...159 | Auto-mix effect, speed controlled by channel 6, channels 1 to 5 without function |
| | 160...191 | Chase (4 colours), speed controlled by channel 6, channels 1 to 5 without function |
| | 192...223 | Chase (12 colours), speed controlled by channel 6, channels 1 to 5 without function |
| | 224...255 | Sound control |
| 8 | 0...255 | Dimmer (0 % to 100 %) |

8 Technical specifications

| | |
|--------------------------|--|
| LEDs | 18 × 4-in-1 quad-colour, 8 W, High-Power RGBW type |
| Beam angle | 25 ° |
| Number of DMX channels | 4, 6 or 8 |
| Operating supply voltage | 230 V ~ 50 Hz |
| Protection | IP30 |
| Power consumption | 120 W |
| Dimensions (W × H × D) | 310 mm × 375 mm × 215 mm |
| Weight | 4.4 kg |

Environmental conditions

| | |
|-------------------|----------------------|
| Temperature range | 0 °C...40 °C |
| Relative humidity | 50 %, non-condensing |

9 Plug and connection assignments

Introduction

This chapter will help you select the right cables and plugs to connect your valuable equipment so that a perfect light experience is guaranteed.

Please take our tips, because especially in 'Sound & Light' caution is indicated: Even if a plug fits into a socket, the result of an incorrect connection may be a destroyed DMX controller, a short circuit or 'just' a not working light show!

DMX connections

The unit offers a 3-pin XLR socket for DMX output and a 3-pin XLR plug for DMX input. Please refer to the drawing and table below for the pin assignment of a suitable XLR plug.

| Pin | Configuration |
|-----|---------------------------------------|
| 1 | Ground, shielding |
| 2 | Signal inverted (DMX-, 'cold signal') |
| 3 | Signal (DMX+, 'hot signal') |

10 Troubleshooting

NOTICE!

Possible data transmission errors

For error-free operation make use of dedicated DMX cables and do not use ordinary microphone cables.

Never connect the DMX input or output to audio devices such as mixers or amplifiers.

In the following we list a few common problems that may occur during operation. We give you some suggestions for easy troubleshooting:

| Symptom | Remedy |
|------------------------------------|---|
| The unit does not work, no light. | Check the mains connection and the fuse. |
| No response to the DMX controller. | 1. Check the DMX ports and cables for proper connection. |
| | 2. Check the address settings and the DMX polarity. |
| | 3. Try using another DMX controller. |
| | 4. Check to see if the DMX cables run near or alongside to high voltage cables that may cause damage or interference to DMX interface circuits. |

If the procedures recommended above do not succeed, please contact our Service Center. You can find the contact information at www.thomann.de.

11 Cleaning

Optical lenses

Clean the optical lenses, that are accessible from the outside, regularly in order to optimize the light output. The frequency of cleaning depends on the operating environment: wet, smoky or particularly dirty surroundings can cause more accumulation of dirt on the optics of the device.

- Clean with a soft cloth using our lamp and lens cleaner (item no. 280122).
- Always dry the parts carefully.

Fan grids

The fan grids of the device must be cleaned on a regular basis to remove dust and dirt. Before cleaning, switch off the device and disconnect AC-powered devices from the mains. Use a lint-free damp cloth for cleaning. Never use solvents or alcohol for cleaning.

12 Protecting the environment

Disposal of the packaging material

For the transport and protective packaging, environmentally friendly materials have been chosen that can be supplied to normal recycling.

Ensure that plastic bags, packaging, etc. are properly disposed of.

Do not just dispose of these materials with your normal household waste, but make sure that they are collected for recycling. Please follow the notes and markings on the packaging.

Disposal of your old device

This product is subject to the European Waste Electrical and Electronic Equipment Directive (WEEE) in its currently valid version. Do not dispose with your normal household waste.

Dispose of this device through an approved waste disposal firm or through your local waste facility. When discarding the device, comply with the rules and regulations that apply in your country. If in doubt, consult your local waste disposal facility.

Stage-PAR CX-3 RGBW18x8W
