1 General information

This user manual contains important information on the safe operation of the device. Read and follow all safety notes and all instructions. Save this manual for future reference. Make sure that it is available to all persons using this device. If you sell the device to another user, be sure that they also receive this manual.

Our products and user manuals are subject to a process of continuous development. We therefore reserve the right to make changes without notice. Please refer to the latest version of the user manual which is ready for download under <u>www.thomann.de</u>.

1.1 Further information

On our website (<u>www.thomann.de</u>) you will find lots of further information and details on the following points:

Download	This manual is also available as PDF file for you to download.
Keyword search	Use the search function in the electronic version to find the topics of interest for you quickly.
Online guides	Our online guides provide detailed information on technical basics and terms.
Personal consultation	For personal consultation please contact our technical hotline.
Service	If you have any problems with the device the customer service will gladly assist you.

1.2 Notational conventions

This manual uses the following notational conventions:

Letterings The letterings for connectors and controls are marked by square brackets and italics.

Examples: [VOLUME] control, [Mono] button.

DisplaysTexts and values displayed on the device are marked by quotation marks and italics.

Examples: '24ch', 'OFF'.

Instructions

The individual steps of an instruction are numbered consecutively. The result of a step is indented and highlighted by an arrow.

Example:

- **1.** Switch on the device.
- **2.** Press [Auto].
 - ⇒ Automatic operation is started.
- **3.** Switch off the device.

1.3 Symbols and signal words

In this section you will find an overview of the meaning of symbols and signal words that are used in this manual.

Signal word	Meaning	
DANGER!	This combination of symbol and signal word indicates an immediate dangerous situation that will result in death or serious injury if it is not avoided.	
WARNING!	This combination of symbol and signal word indicates a possible dangerous situation that can result in death or serious injury if it is not avoided.	
NOTICE!	This combination of symbol and signal word indicates a possible dangerous situation that can result in material and environmental damage if it is not avoided.	
Warning signs	Type of danger	
A	Warning – high-voltage.	
	Warning – hot surface.	

Warning signs	Type of danger
	Warning – dangerous optical radiation.
	Warning – suspended load.
<u>^</u>	Warning – danger zone.

2 Safety

Intended use

This device is intended for use as an electronic lighting effect by means of LED technology. The device is designed for professional use and is not suitable for use in households. Use the device only as described in this user manual. Any other use or use under other operating conditions is considered to be improper and may result in personal injury or property damage. No liability will be assumed for damages resulting from improper use.

This device may be used only by persons with sufficient physical, sensorial, and intellectual abilities and having corresponding knowledge and experience. Other persons may use this device only if they are supervised or instructed by a person who is responsible for their safety.

Extend the life of the device by regular breaks in operation and avoid switching it on and off frequently. This device is not suitable for continuous use.

Safety

DANGER!

Danger for children

Ensure that plastic bags, packaging, etc. are disposed of properly and are not within reach of babies and young children. Choking hazard!

Ensure that children do not detach any small parts (e.g. knobs or the like) from the unit. They could swallow the pieces and choke!

Never let children unattended use electrical devices.

DANGER!

Electric shock caused by short-circuit

Do not modify the mains cable or the plug. Failure to do so could result in electric shock/death or fire. If in doubt, seek advice from a registered electrician.

DANGER!

Electric shock caused by high voltages inside

Within the device there are areas where high voltages may be present. Never remove any covers.

There are no user-serviceable parts inside.

Do not use the device if covers, protectors or optical components are missing or damaged.

WARNING!

Eye damage caused by high light intensity

Never look directly into the light source.

WARNING!

Risk of epileptic shock

Strobe lighting can trigger seizures in photosensitive epilepsy. Sensitive persons should avoid looking at strobe lights.

WARNING!

Risk of burns

The surface of the device can become very hot during operation.

Do not touch the device with bare hands during operation, and after switching off wait for at least 15 minutes.

NOTICE!

Risk of fire

Do not block areas of ventilation. Do not install the device near any direct heat source. Keep the device away from naked flames.

NOTICE!

Power supply

Before connecting the device, ensure that the input voltage (AC outlet) matches the voltage rating of the device and that the AC outlet is protected by a residual current circuit breaker. Failure to do so could result in damage to the device and possibly injure the user.

Unplug the device before electrical storms occur and when it is unused for long periods of time to reduce the risk of electric shock or fire.

3 Features

Due to its sturdy and weather-proof housing made of die-cast aluminium, the device is especially suitable for outdoor use. With the very bright six-colour LEDs, it is particularly suitable for professional lighting tasks.

Special features of the device:

- 12 × six-colour LEDs (RGBWAUV, each 10 W)
- Control via DMX and via buttons and display on the unit
- Built-in automatic show programmes
- Master / Slave operation
- Protection class IP65
- Sturdy double bracket for secure attachment to trusses or firm footing on the ground
- Connections for power supply and DMX control by means of
 - LED Typhoon PAR Outdoor 12x10 (item no. 386284): permanently connected cables with splash-proof screwable and lockable plugs and couplings
 - LED Typhoon True PAR 12x10 Outdoor (item no. 420255): splash-proof screwable and lockable plugs and couplings
- Mains power adapter with safety plug included

- Rugged die-cast aluminium housing
- Pressure compensation element (prevents condensation inside the device)

Information about protection class IP65

Equipment with protection class IP65 are dust-tight and completely protected against contact (first code number). They are also protected against splash water from any angle (second code digit). That is why this equipment can also be used outdoors. Event technology equipment is generally only designed for temporary use however (event lighting) and not for permanent use outdoors.

The specified protection class does not make a statement about the weather resistance of the equipment (resistance to changing ambient conditions as well as against the effects of sunlight and UV rays).

The seals and screw connections of the equipment must be checked regularly to ensure a fault-free operation. In cases of doubt, consult a specialist workshop in due time.

For technological reasons, the light output of LEDs decreases over their lifetime. This effect increases with higher operating temperature. You can extend the service life of the illuminants by providing adequate ventilation and operating the LEDs with the lowest possible brightness.

4 Installation

Unpack and check carefully there is no transportation damage before using the unit. Keep the equipment packaging. To fully protect the product against vibration, dust and moisture during transportation or storage use the original packaging or your own packaging material suitable for transport or storage, respectively.

WARNING!

Risk of injury caused by falling objects

Make sure that the installation complies with the standards and rules that apply in your country. Always secure the device with a secondary safety attachment, such as a safety cable or a safety chain.

NOTICE!

Risk of overheating

Always ensure sufficient ventilation.

The ambient temperature must not exceed the limits stated in the chapter Technical Specifications of the User Manual.

NOTICE!

Use of stands

NOTICE!

Possible data transmission errors

For error-free operation make use of dedicated DMX cables and do not use ordinary microphone cables.

Never connect the DMX input or output to audio devices such as mixers or amplifiers.

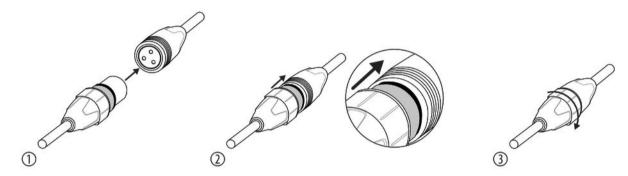

NOTICE!

Possible damage due to moisture

Moisture entering into open connectors (plugs and couplers) of DMX or power cords can cause short circuits.

Close unused connectors with end caps intended for this purpose (www.thomann.de).

Connecting the DMX IP65 connectors

Proceed as follows to connect the DMX-IP65 connectors:

- **1.** Insert the plug completely and straight into the coupling.
- **2.** Make sure that the flexible sealing ring has complete contact.
- **3.** Turn the union nut straight onto the thread of the coupling. Hand-tighten the union nut.

Mounting options

You can install the unit in hanging or standing position. When in use, the device must always be attached to a solid surface or an approved truss. Use the openings provided on the two-piece bracket for attaching.

Always work from a stable platform whenever installing, moving or servicing the unit. In doing so, the area underneath the unit must be cordoned off.

The safety cable must be attached to the bracket (with item no. 386284) or to the safety eyelet (item no. 420255).

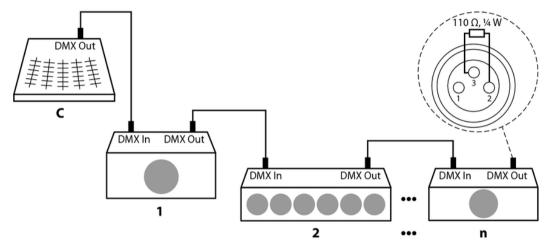

Please note that this device must not be connected to a dimmer.

Starting up

Create all connections while the device is off. Use the shortest possible high-quality cables for all connections. Take care when running the cables to prevent tripping hazards.

Connections in DMX mode

Connect the DMX input of the device to the DMX output of a DMX controller or another DMX device. Connect the output of the first DMX device to the input of the second one, and so on to form a daisy chain. Always ensure that the output of the last DMX device in the daisy chain is terminated with a resistor (110 Ω , $\frac{1}{4}$ W).

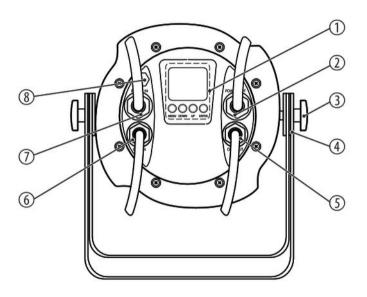

Connections in 'Master / Slave' mode

When you configure a group of devices in 'Master / Slave' mode, the first unit will control the others. This feature is especially useful to start a show without much programming. Connect the DMX output of the master unit to the DMX input of the first slave unit. Then connect the DMX output of the first slave unit to the DMX input of the second slave unit and so on.

Connections and controls 6

LED Typhoon PAR Outdoor 12x10 (item no. 386284)

Display and keypad

The header displays the current operating mode, for example 'DMX' or 'SLAVE'. The dot-shaped DMX indicator lights green when a DMX signal is received and red when transmission is interrupted. The display shows the current device temperature top right. If the maximum permissible temperature is exceeded, the text appears in yellow.

In the middle of the display are selected menus and set values.

In the status bar at the bottom of the display, the message on the key lock appears. 'Key lock open' means that the key lock function is off. 'Key lock open' means that the key lock function is on.

[MENU]

Activates the main menu and toggles between menu items.

[DOWN]

Decreases the displayed value by one.

[UP]

Increases the displayed value by one.

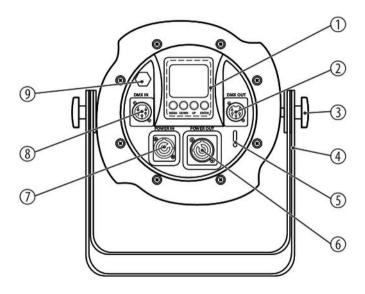

[ENTER]

Selects an option of the respective operating mode.

2 [POWER OUT]

	Connection supply voltage outgoing (Power Twist IP65)
3	Bracket adjustment knobs
4	Two-piece bracket for hanging or installation and for securing the safety cable
5	[DMX OUT]
	DMX output
6	[DMX IN]
	DMX input
7	[POWER IN]
	Connection supply voltage incoming (Power Twist IP65)
8	Pressure compensation element

LED Typhoon True PAR 12x10 Outdoor (item no. 420255)

Display and keypad

The header displays the current operating mode, for example 'DMX' or 'SLAVE'. The dot-shaped DMX indicator lights green when a DMX signal is received and red when transmission is interrupted. The display shows the current device temperature top right. If the maximum permissible temperature is exceeded, the text appears in yellow.

In the middle of the display are selected menus and set values.

In the status bar at the bottom of the display, the message on the key lock appears. 'Key lock open' means that the key lock function is off. 'Key lock open' means that the key lock function is on.

[MENU]

Activates the main menu and toggles between menu items.

[DOWN]

Decreases the displayed value by one.

[UP]

Increases the displayed value by one.

[ENTER]

Selects an option of the respective operating mode.

2 [DMX OUT]

Connections and controls

	DMX output, designed as 5-pin XLR chassis-mounted coupling
3	Bracket adjustment knobs
4	Two-piece bracket for hanging or floor setup
5	Safety cable eyelet.
6	[POWER OUT]
	Connection supply voltage outgoing (Power Twist IP65)
7	[POWER IN]
	Connection supply voltage incoming (Power Twist IP65)
8	[DMX IN]
	DMX input, designed as 5-pin XLR chassis-mounted plug
9	Pressure compensation element

7 Operating

7.1 Starting the device

Connect the device to the power supply to start operation. After a few seconds, the display indicates that a reset is in progress. The device is then ready for use. The display shows the operating mode that was selected when the unit was last powered off.

7.2 Main menu

Press [ENTER] to activate the main menu. Use the buttons [UP] and [DOWN] to select a submenu. When the display shows the desired submenu, press [ENTER] to open it. To close the main menu, press [MODE].

All previously made settings are retained even when you disconnect the device from the power grid. To restart with default values, use the 'RESET' function.

The following table shows the setting options.

Main menu	Menu level 2	Menu level 3	Menu level 4	
	Meaning			
'DMX'	DMX mode selection and	DMX address setting		
	'CHANNEL 03'	3-channel DMX mode		
	'CHANNEL 06'	6-channel DMX mode		
	'CHANNEL 08'	08-channel DMX mode		
	'CHANNEL 10'	10-channel DMX mode		
	'CHANNEL 13'	13-channel DMX mode		
	'ADDRESS 001' 'ADDRESS 512'	Setting the DMX address

Technical specifications

		LED Typhoon PAR Outdoor 12x10	LED Typhoon True PAR 12x10 Outdoor	
		item no. 386284	item no. 420255	
Light source		12 × LED RGBAW UV	6 in 1, each 10 W	
Optical properties	Beam angle	15°		
Control		DMX		
		Buttons and display on the unit		
Number of DMX channel	S	3, 6, 8, 10 13		
Input connections	Voltage supply	permanently con- nected cable with splash-proof screwable and lockable plug	Lockable input socket Power Twist TR1 IP65	

		LED Typhoon PAR Outdoor 12x10	LED Typhoon True PAR 12x10 Outdoor
		item no. 386284	item no. 420255
	DMX control	permanently con- nected cable with DMX IP65 plug	XLR chassis plug (IP65), 5-pin
Output connections	Voltage supply of other devices	permanently con- nected cable with splash-proof screwable and lockable socket	Lockable output socket Power Twist TR1 IP65
	DMX control	permanently con- nected cable with DMX IP65 socket	XLR chassis socket (IP65), 5-pin
Power consumption		120 W	
Supply voltage		100 − 240 V ~ 50/60 Hz	
Degree of protection		IP65	

		LED Typhoon PAR Outdoor 12x10	LED Typhoon True PAR 12x10 Outdoor
		item no. 386284	item no. 420255
Mounting options		hanging, standing	
Dimensions (W \times H \times D)		$305~\text{mm} \times 143~\text{mm} \times 288~\text{mm}$	
Weight		4.54 kg	
Ambient conditions	Temperature range	0 °C40 °C	
	Relative humidity	50 %, non-condensing	

Further information

Item no.	LED Typhoon PAR Outdoor 12x10 item no. 386284	LED Typhoon True PAR 12x10 Outdoor item no. 420255
Construction	Flat PAR	Flat PAR
Number of LEDs	12	12
Color mixing	RGBAW UV	RGBAW UV
LED type	x-in-1	x-in-1
Floor housing	Yes	Yes
Fanless	Yes	Yes
Remote control	Not possible	Not possible
Wireless DMX	No	No
Housing color	Black	Black

9 Plug and connection assignment

Introduction

This chapter will help you select the right cables and plugs to connect your valuable equipment so that a perfect light experience is guaranteed.

Please take our tips, because especially in 'Sound & Light' caution is indicated: Even if a plug fits into a socket, the result of an incorrect connection may be a destroyed DMX controller, a short circuit or 'just' a not working light show!

DMX connections

The unit offers a 3-pin XLR socket for DMX output and a 3-pin XLR plug for DMX input. Please refer to the drawing and table below for the pin assignment of a suitable XLR plug.

Pin	Configuration
1	Ground, shielding
2	Signal inverted (DMX–, 'cold signal')
3	Signal (DMX+, 'hot signal')

DMX connections

A five-pin XLR socket serves as DMX output, a five-pin XLR plug serves as DMX input. The drawing below and the table show the pin assignment of a matching coupling.

Pin	Assignment
1	Ground (shielding)
2	Signal inverted (DMX–, 'cold')
3	Signal (DMX+, 'hot')
4	unused / second connection (DMX–)
5	unused / second connection (DMX+)

10 Troubleshooting

NOTICE!

Possible data transmission errors

For error-free operation make use of dedicated DMX cables and do not use ordinary microphone cables.

Never connect the DMX input or output to audio devices such as mixers or amplifiers.

In the following we list a few common problems that may occur during operation. We give you some suggestions for easy troubleshooting:

Symptom	Remedy
The unit does not work, no light.	Check the mains connection and the fuse.
No response to the DMX con-	1. Check the DMX ports and cables for proper connection.
troller.	2. Check the address settings and the DMX polarity.
	3. Try using another DMX controller.
	4. Check to see if the DMX cables run near or alongside to high voltage cables that may cause damage or interference to DMX interface circuits.

If the procedures recommended above do not succeed, please contact our Service Center. You can find the contact information at www.thomann.de.

11 Cleaning

Optical lenses

Clean the optical lenses, that are accessible from the outside, regularly in order to optimize the light output. The frequency of cleaning depends on the operating environment: wet, smoky or particularly dirty surroundings can cause more accumulation of dirt on the optics of the device.

- Clean with a soft cloth using our lamp and lens cleaner (item no. 280122).
- Always dry the parts carefully.

12 Protecting the environment

Disposal of the packaging material

For the transport and protective packaging, environmentally friendly materials have been chosen that can be supplied to normal recycling.

Ensure that plastic bags, packaging, etc. are properly disposed of.

Do not just dispose of these materials with your normal household waste, but make sure that they are collected for recycling. Please follow the notes and markings on the packaging.

Disposal of your old device

This product is subject to the European Waste Electrical and Electronic Equipment Directive (WEEE) in its currently valid version. Do not dispose with your normal household waste.

Dispose of this device through an approved waste disposal firm or through your local waste facility. When discarding the device, comply with the rules and regulations that apply in your country. If in doubt, consult your local waste disposal facility.
